

Introduction to the Power BI Platform

Agenda

- Introduction to the Power BI Platform
- Creating a Power BI Test Environment
- Introduction to the Power BI Service
- Creating Datasets, Reports and Dashboards
- Loading a Sample Content Pack

What is Business Intelligence?

- BI focuses on business health and performance
 - Gather insights into health of business processes
 - Take corrective actions in a timely fashion
- BI projects typically involve the following...
 - Integrate data from multiple sources
 - Perform data transformation and complex calculations
 - Analyze large data sets with rapid query response
 - Create insightful reports and visualizations
 - Provide insights that are “actionable”

How is the BI Software Industry Changing?

- Software industry is experiencing new proliferation of data
 - Number of telemetry devices is increasing exponentially
 - Machine-generated data is providing new business opportunities
 - Example: Uber has used geolocation data to disrupt taxi industry
- Traditional BI and analytics models are being disrupted
 - New analytics capabilities available with new types of data sources
 - Data discovery and unstructured data analytics are new frontiers
 - Demand for self-service BI tools are on the rise
 - Balance of power shifting from IT to business divisions

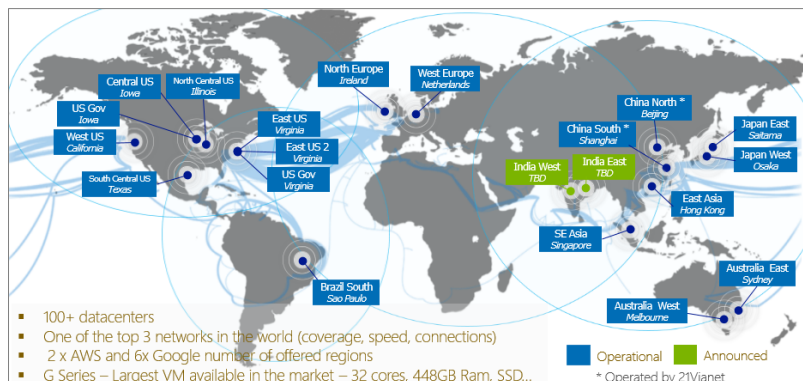

What is Power BI?

- What is Power BI?
 - Cloud-based subscription service
 - Environment which promotes self-service BI *to the end user*
 - BI Platform to assist with data import, analysis and visualization
- Power BI benefits from being a cloud-based service
 - It takes only 5 seconds to subscribe to the Power BI service
 - New users can create something significant in 5 minutes or less
- Power BI adoption numbers *(as of Q1 2016)*
 - 5 million subscribers
 - 200,000 organizations
 - 40 different languages

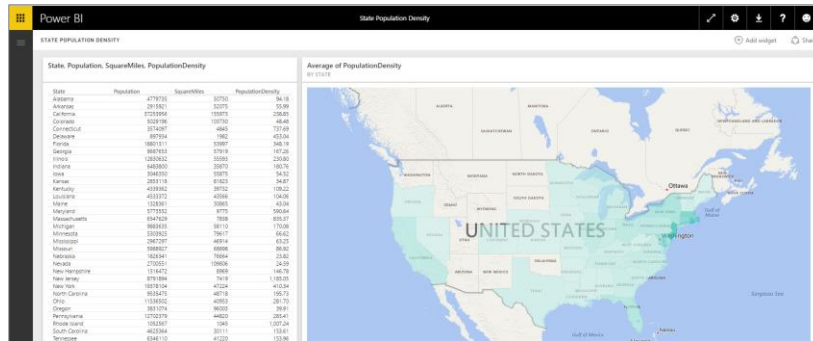

Power BI Benefits from Microsoft Azure

- Power BI is Built on Top of Microsoft Azure
 - Power BI solutions can be scaled as required
 - Power BI solutions have international reach

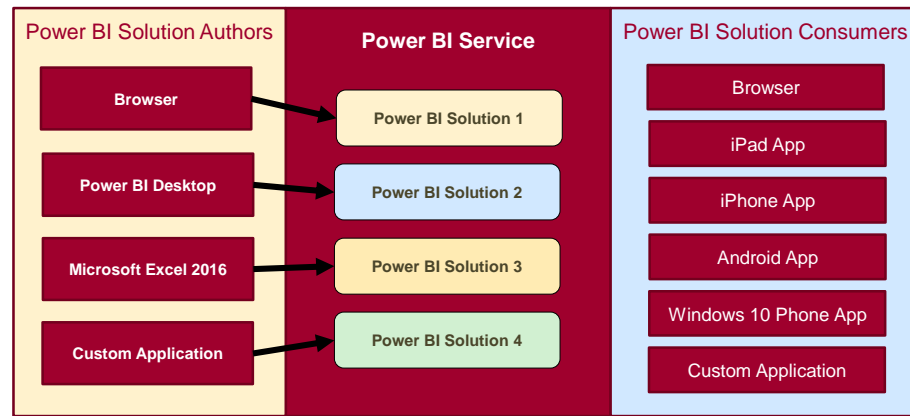

The Power BI Service

- The Power BI Service
 - Provides cloud-based foundation for Power BI platform
 - Accessible to subscribers through <https://app.powerbi.com>
 - Provides cross-browser experience for BI solution consumers
 - Provides limited support to BI solution authors

Power BI Service Architecture

- Power BI support for authors and consumers
 - BI solution authors have a choose in authoring tools
 - BI solutions consumers can use wide range of devices

Power BI Workspaces

- Power BI manages user context using workspaces
 - User is always running within the scope of a specific workspace
 - Every subscribers has a Personal workspace (i.e. My Workspace)
 - Group workspaces can be created for team-based authoring
- Workspace is container with three collections
 - Dashboards
 - Reports
 - Datasets

Central Power BI Concepts

- Workspace
 - Provides user context (personal workspaces & group workspaces)
- Dashboard
 - Dashboard provides consolidated view into reports and datasets
 - Provides entry point in custom solution for Power BI consumers
- Report
 - Report is a collection of pages containing visuals
 - Report visual can be pinned to a dashboard
- Dataset
 - A data model containing one or more tables
 - Can be very simple or very complex

Tabular Database Model

- Power BI Datasets based on Tabular Database model
 - Provides less-complicated alternative to multidimensional model
 - You model tabular databases using Power Pivot and DAX
- Tabular Data Model based on xVelocity Database Engine
 - Desktop version of xVecocity in Excel with Power Pivot add-in
 - Desktop version of xVecocity in Power BI Desktop
 - Server-side version of xVelecity included with SSAS
 - Cloud-based version of xVecolicty runs in Power BI service

Power BI Tools

- Power BI service using a standard web browser
 - Import datasets
 - Design reports and dashboards
 - Create content packs
 - No dataset authoring tools
- Power BI Desktop
 - Create datasets using Power Query
 - Model datasets using Power Pivot and DAX
 - Design reports
 - Publish PBIX files from local desktop to Power BI service
- Microsoft Excel 2016
 - Similar feature set to Power BI Desktop for Power Query and Power Pivot
 - Contains extra features, charts and visuals not supported Power BI
 - An complete BI solution can be embedded in a Excel workbook file

Agenda

- ✓ Introduction to the Power BI Platform
- Creating a Power BI Test Environment
 - Introduction to the Power BI Service
 - Creating Datasets, Reports and Dashboards
 - Loading a Sample Content Pack

Creating a Power BI Testing Environment

- Sign up for an Office 365 trial account
 - Creates a new Office 365 tenant
 - Sign up account you use becomes tenant administrator
 - You can add up to 25 user accounts
 - User can be configured trial licenses for Office 365 and Power BI

Office 365 Enterprise E3 Trial

Hello Edward

Save this info. You'll need it later.

Office 365 sign-in page

You're in

Setup Guide for Creating a Test Environment for Power BI Projects

- Setup Task 1: Create a new Office 365 Trial Tenant
- Setup Task 2: Verify You Have Access to Office 365 Mail
- Setup Task 3: Upload a Workbook with Sample Data to OneDrive for Busi...
- Setup Task 4: Add Trial User Licenses for Power BI Pro
- Setup Task 5: Create a Second User Account for Testing Purposes
- Setup Task 6: Use the Power BI Service to Import a New Dataset
- Setup Task 7: Create a New Power BI Report with Multiple Pages
- Setup Task 8: Create and Share a Power BI Dashboard

Your First Stop - Office 365 admin center

- What will you need to do in Office 365 admin center?
 - Purchase 30 trial for Power BI Pro
 - Configure your Power BI License
 - Add a secondary user account for testing

Add a Secondary User for Testing

1 Click the **+ Add** button in the **ACTIVE USERS** section.

2 In the **Create new user account** dialog, enter the user details:

- First name: Andy
- Last name: Enduser
- Display name: Andy Enduser
- Email address: Andy.Enduser@CptBtLabs.onmicrosoft.com
- User name: User1@CptBtLabs.onmicrosoft.com
- Auto-generated password: [Generated Password]
- Type password: [Type Password]

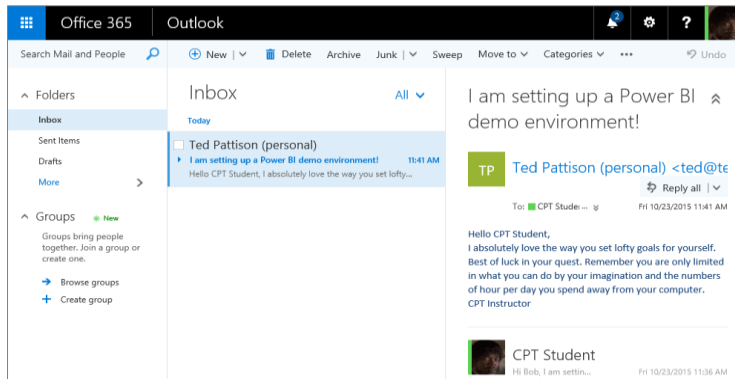

3 In the **Email password to the following recipients** dialog, select the recipient and licenses:

Select licenses for this user:	Available Licenses
<input checked="" type="checkbox"/> Power BI Pro	24 of 25 licenses available
<input checked="" type="checkbox"/> Office 365 Enterprise E3	24 of 25 licenses available

4 The new user **Andy Enduser** is added to the **ACTIVE USERS** list. The user profile card shows the user's name, email, and options to **RESET PASSWORD**, **EDIT USER ROLES**, **DELETE**, or **ADD TO GROUP**.

Accessing Your Office 365 Mailbox

- Make sure you can access your Office 365 Inbox
 - View messages sent by Power BI service

Uploading Data Files to OneDrive for Office 365

- Preferred location for data files consumed by Power BI service
 - Excel workbooks
 - CSV files
 - PBIX files created using Power BI Desktop

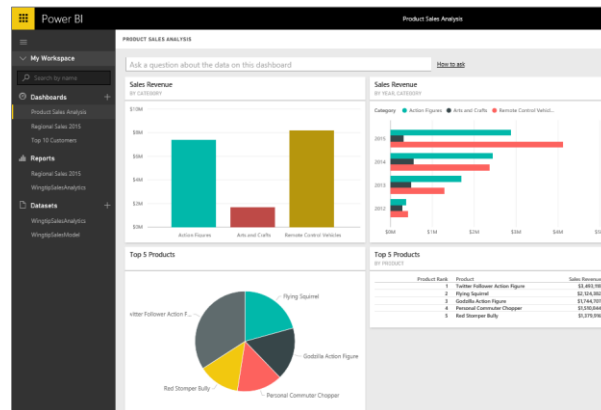

Agenda

- ✓ Introduction to the Power BI Platform
- ✓ Creating a Power BI Test Environment
- Introduction to the Power BI Service
 - Creating Datasets, Reports and Dashboards
 - Loading a Sample Content Pack

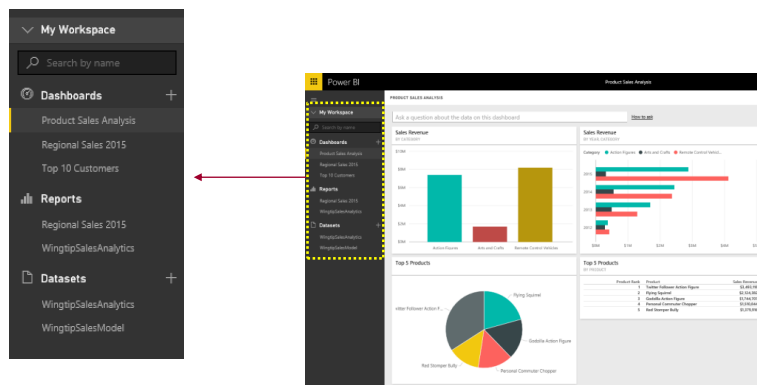

Power BI Service

- Power BI service is accessible through browser
- Logged in user runs in context of a specific workspace
- Provides user with access to dashboards, reports and datasets

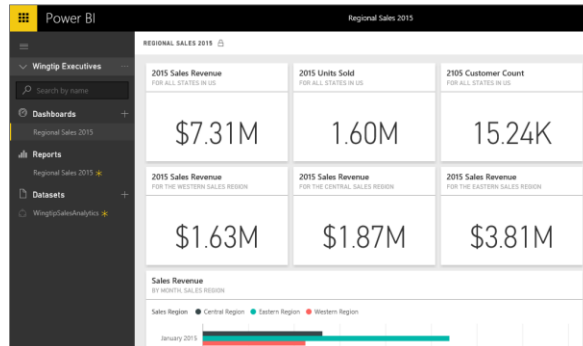

The Navigation Pane

- Navigation pane is central to user experience
- Displays links to visible dashboards, reports and datasets
- Allows user to move between workspaces
- Allows user to create new group workspace

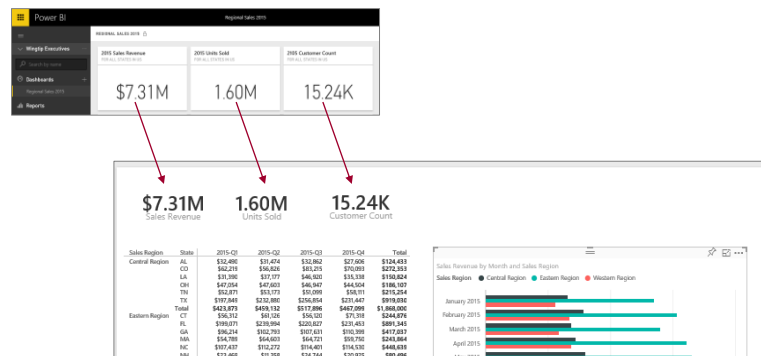

Dashboards and Tiles

- Dashboard is a collection of tiles
 - Tile can be created by pinning visual from a report
 - Tile can be created by pinning query result from dataset

Dashboards and Reports

- Dashboards link users to reports
 - Dashboard tiles designed to provide high-level view
 - Clicking tiles drills down into report to see more detail

Reports and Pages

- Reports contain one or more pages
 - A report can be designed with a single page
 - A report can be designed with many pages
 - Tabbed navigation located at bottom of report view

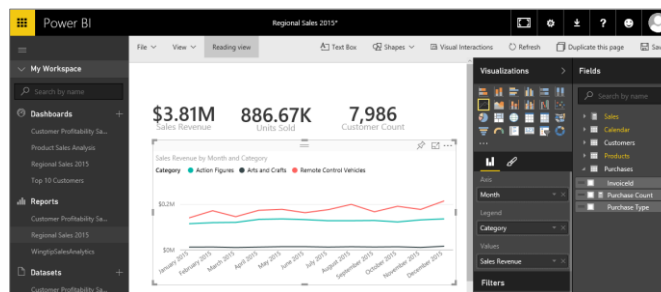

Report Authoring

- Report initially opens in reading view
 - Click Edit report to switch to edit mode

- Report design tools appear on right side of page

Visuals (aka Visualizations)

- Reports are designed using visual (aka visualizations)
 - Each visual is based on an underlying visualization type
 - Visualization type can be changed using **Visualizations** pane

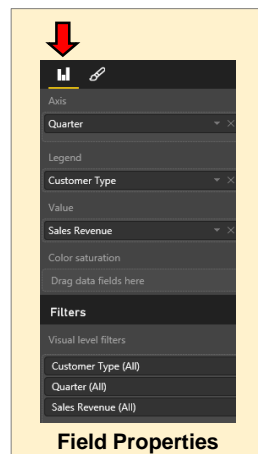

- Visuals creating by using fields from tables inside **Fields** list

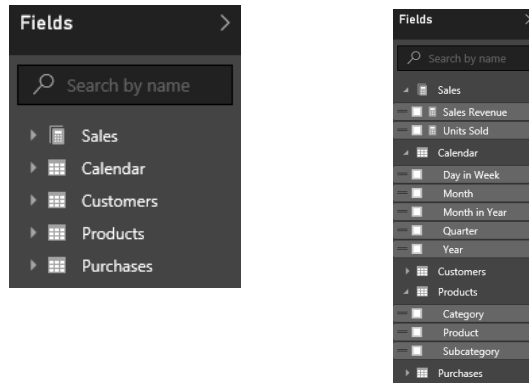

Editing Visual Properties

- Visuals have Field properties and Format properties
 - Visual properties vary depending on visualization type

Report and Datasets

- Each report is based on an underlying dataset
 - **Fields** list in report designer shows tables and fields
 - Report author sees tables & fields as dataset consumer

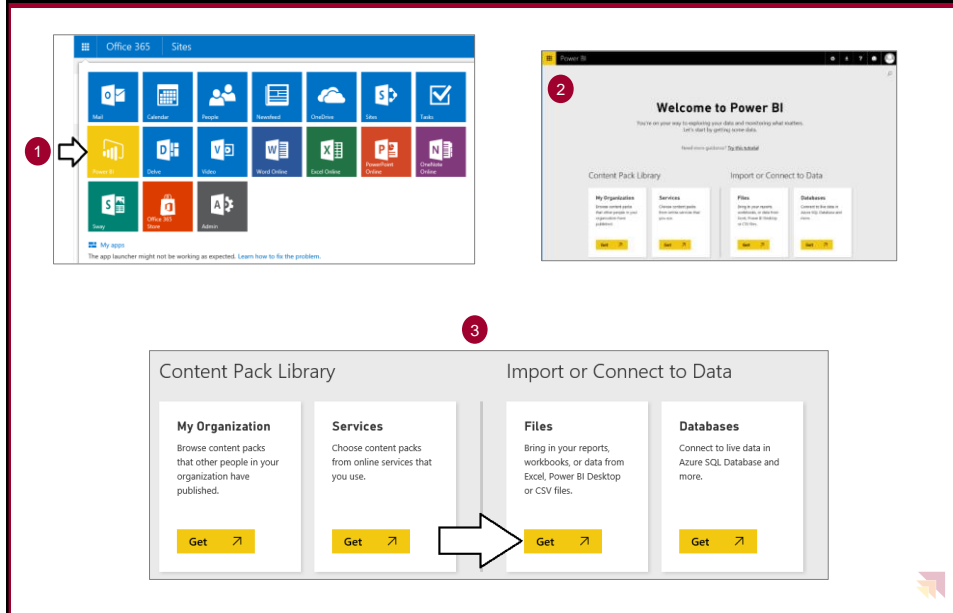

Agenda

- ✓ Introduction to the Power BI Platform
- ✓ Creating a Power BI Test Environment
- ✓ Introduction to the Power BI Service
- Creating Datasets, Reports and Dashboards
- Loading a Sample Content Pack

Getting Started with the Power BI Service

Importing a Dataset

- Connect to files in OneDrive

- Select the file and click Connect

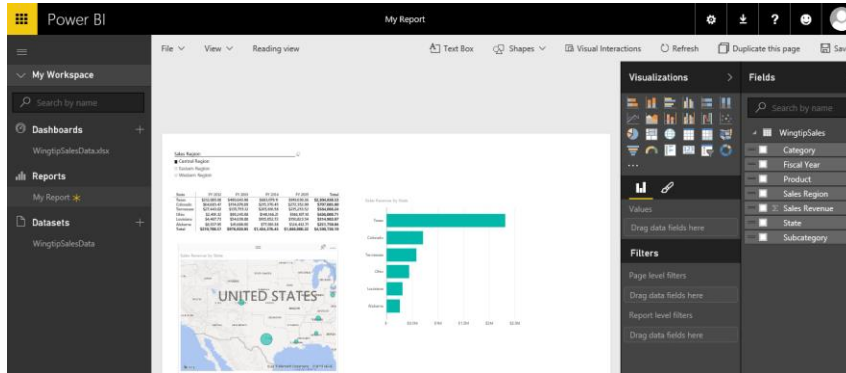

- Choose between Import or Connect

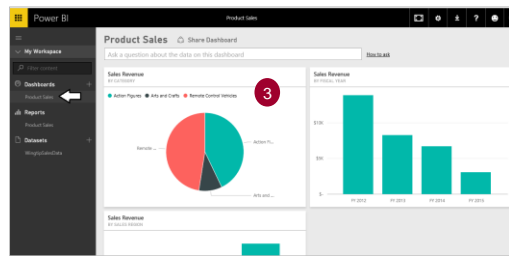

Designing Reports

- Power BI service provides browser-based report designer
 - Report contains one or more pages
 - Pages contain visuals (aka visualizations)
 - Visuals display fields from underlying data model

Creating Dashboards

- Dashboards contain tiles
 - Tiles created from visuals on report pages

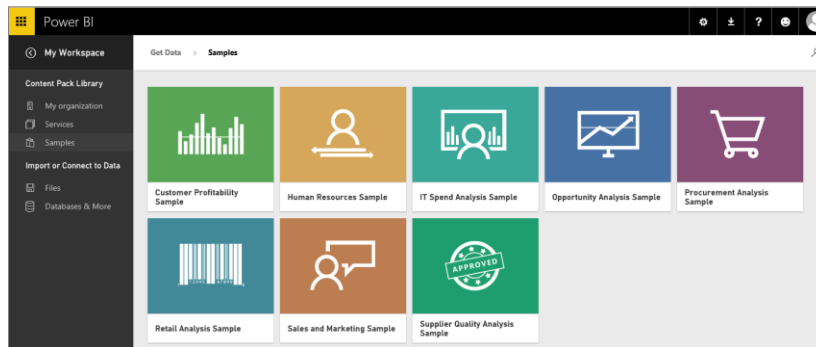

Agenda

- ✓ Introduction to the Power BI Platform
- ✓ Creating a Power BI Test Environment
- ✓ Introduction to the Power BI Service
- ✓ Creating Datasets, Reports and Dashboards
- Loading a Sample Content Pack

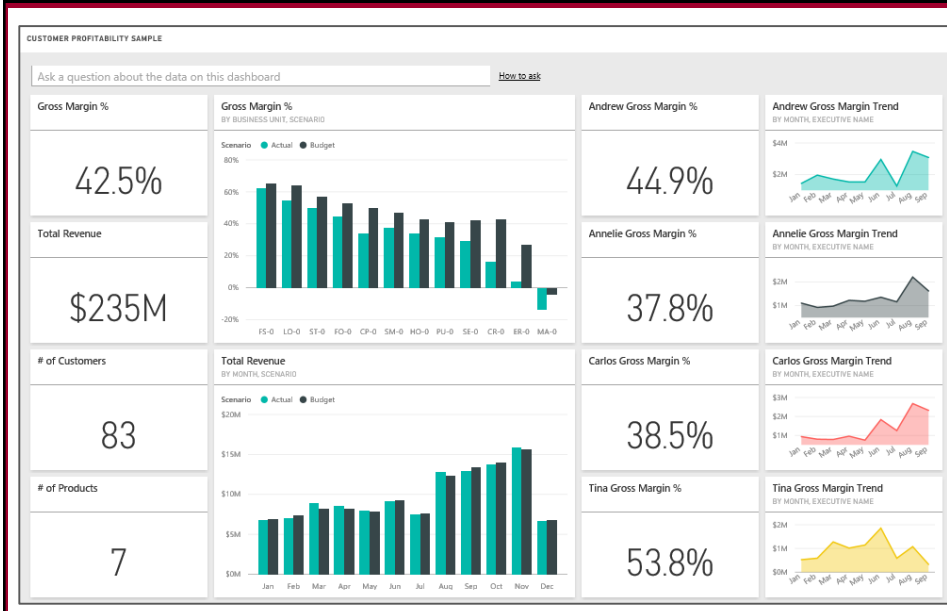

Power BI Sample Content Packs

- Power BI service offers sample BI solutions
 - Each sample installs in seconds
 - Samples provide examples of dashboards, reports and datasets
 - Provides sample solutions for common BI solution scenarios

Customer Profitability Dashboard Sample

Summary
